Join Us September 9 at 6 p.m. ET

The global economic crisis and pandemic have highlighted a number of issues we face across the government and in our communities. While Americans are working remotely and social distancing, we are quickly coming to the reality that digital infrastructure is critical infrastructure. Blockchain technology has been touted as one of the most important technological advancements of our time. But how can this technology be leveraged to address some of the biggest challenges facing the U.S. today?

Join us for the first ever U.S. Blockchain Debate, hosted by Darren Soto, Co-Chair of the Congressional Blockchain Caucus, and Chamber of Digital Commerce PAC, where industry leaders and technologists will discuss how this technology can potentially be used to strengthen government services, the financial system, economy and more.
